<https://www.linkedin.com/in/dhruvi-bagga-63663737b> | <https://github.com/dhruvi-2014>

PROFESSIONAL SUMMARY

MCA student (CGPA: 9.9/10) specializing in Storage & Cloud Technology with hands-on experience in AWS, Linux, Python, SQL, Docker and Git gained through 2 internships and 3+ cloud and software projects. AWS Certified Solutions Architect (Associate) with practical experience in AWS cloud deployment, Linux administration, cloud security and CI/CD concepts. Passionate about building secure, scalable and reliable cloud solutions.

EXPERIENCE

Data Engineer Intern – J2D Technologies (Bengaluru | June 2026 – Aug 2026)

- Developed a real-time financial transaction streaming pipeline using Kafka, Azure Databricks and Data Factory, PySpark and Structured Streaming for processing credit-card transaction data.
- Built real-time fraud detection and alerting workflows using customer transaction limits, fraud watchlists, joins, watermarks and sliding-window aggregations, with monitoring through a Databricks dashboard.

Crime Scene Analysis – Bengaluru Police (Bengaluru | Feb 2025 – March 2025)

- Assisted in 20 crime scene investigations, cloud forensics and evidence analysis across cybercrime, financial crimes and theft cases.
- Developed analytical, reporting and investigative skills while following forensic procedures.

Campus Catalyst Crew – CloudSEK (Bengaluru | Aug 2024 – Nov 2024)

- Contributed to 3 cybersecurity projects involving threat analysis, deepfake detection and spam detection.
- Strengthened knowledge of incident response, risk mitigation, teamwork and communication.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, EBS, AMI, CloudWatch, Lambda, CICD Services), Azure Data Factory, Azure SQL

DevOps & CI/CD: Git, GitHub, Jenkins, CI/CD, Linux (Ubuntu, Amazon Linux)

Programming & Scripting: Python, SQL, Java, C, Bash

Databases: MySQL, SQL Server

Cloud & Data Engineering: ETL, Data Pipelines, Data Integration

Containerization & Orchestration: Docker, Kubernetes (Basics)

Networking: TCP/IP, VPC, VPN, DNS, Wireshark, Cisco Packet Tracer, GNS3

Security: IAM, AES, SHA-256, EnCase, FTK, UFED, IDS/IPS

Core Concepts: DBMS, Operating Systems, Computer Networks, OOP, DSA

CERTIFICATIONS

AWS Certified Solutions Architect – Associate level

Certified Fraud Examiner (CFE)

AWS Developer Training

DSA with C Language

Google Cybersecurity Professional Certificate

PROJECTS

SECURE EVIDENCE CAPTURE SYSTEM

- Developed an Android application for secure evidence capture using AES encryption, SHA-256 hashing and Room Database for secure storage and integrity verification
- Implemented a cloud0bsed CI/CD workflow using Jenkins and AWS, automating application build, testing, APK generation and artifact storage.
- **Tech Stack:** Kotlin, Android Studio, Room Database, Jenkins, GitHub, AWS S3 & EC2
- <https://github.com/EVIDA-Project>

AUTH-KERNAL - Modular Authentication Framework

- Developed a modular authentication framework supporting RBAC, ABAC, and secure session management.
- **Tech Stack:** Java, Authentication Concepts
- <https://github.com/dhruvi-2014/AuthCore>

FINGUARD – REAL Time Fraud Detection & Streaming Analytics

- Built a real-time fraud detection pipeline using Kafka, Databricks, and PySpark with Bronze–Silver–Gold data processing.
- Implemented fraud detection, high-value transaction alerts, and automated email notifications.
- **Tech Stack:** Python, Kafka, Confluent Cloud, Databricks, PySpark, PostgreSQL, SQL.
- https://github.com/dhruvi-2014/Finguard_streaming_project

EDUCATION

- **MCA – Storage & Cloud Technology** (JAIN University, Bengaluru | 2025 – Expected Year 2027 | CGPA: **9.9**)
- **BSc (Hons.) – Forensic Science** (JAIN University, Bengaluru | 2022 – 2025 | C

RESEARCH WORK

CyberJain – Digital Technology Use and Wellbeing Framework

- Proposed a framework to improve digital wellbeing and promote safe online practices through secure technology usage.
- Conducted research on cybersecurity awareness, user behaviour and digital risk mitigation strategies.
- Suggested scalable security recommendations aligned with modern cloud-enabled applications.
- <https://malque.pub/ojs/index.php/hj/article/view/14222>

Multitenancy in Cloud Forensics (AWS) - MethodsX

- Studied forensic investigation challenges in AWS-based multi-tenant cloud environments.
- Analysed techniques for secure evidence collection, isolation and data integrity in shared cloud infrastructures.
- Explored cloud security and forensic best practices for incident response and digital investigations.
